Getting Started

Using the Theme

Load the theme in your preamble and set your metadata:

- `\usetheme{UU}` — basic usage
- `\usetheme[showlogo]{UU}` — logo on every slide
- `\usetheme[nl]{UU}` — Dutch logo variant

For conference-style multi-author title pages, use the standard `\author` / `\institute` with `\and` and `\inst{n}`, then activate with:

- `\multiauthor`
- `\venue{NeurIPS 2026, Utrecht}` (optional)

Theme Options at a Glance

Utrecht University

Flags

Pass as options to `\usetheme[...]{UU}`: `nl`, `showlogo`, `nosectionpage`.

Conference Title

`\multiauthor` activates multi-author layout. Use `\addinstitute{n}{Name}` to list affiliations (numbered automatically). Call `\clearinstitutes` to reset.

Special Frames

`\standoutframe{...}` for emphasis.
`\thankframe{...}{...}` to close.
`\sectionframe{...}` manual section divider.

The `showlogo` flag is active in this demo, check out the top right corner of this slide.

This is a manual \sectionframe

Colour Palette

UU Brand Colours

Primary Colours

- Yellow `#FFCD00`
- Red `#C00A35`
- Black `#000000`
- White `#FFFFFF`

Secondary Colours

- Cream
- Burgundy
- Green
- Dark blue
- Orange
- Brown
- Blue
- Purple

Yellow is the primary colour. Red is used sparingly as accent. Secondary colours are for data visualisation and infographics only.

Typography & Blocks

Typography

1. **Merriweather** (serif) for titles and headings
2. **Open Sans** (sans-serif) for body text
3. Fallback: Palatino + default sans if packages are not installed

Tip

Install `texlive-fonts-extra` for the authentic UU look.

Lists

Itemize uses yellow square markers at three levels:

- First-level items use yellow squares
  - Second-level items use orange
    - Third-level items use brown
- Items can contain **bold**, *italic*, or alerted text
- Keep bullets concise

Enumerate uses numbered yellow squares:

1. First item
2. Second item
3. Third item

Mathematics

The theme supports mathematical typesetting [1]:

$$\int_a^b f(x)\,dx \approx \frac{h}{2}\left[f(x_0) + 2\sum_{i=1}^{n-1} f(x_i) + f(x_n)\right]$$

Note

This is a note block, intended to grab the reader's attention.

Diagrams & Code

Workflow Diagram

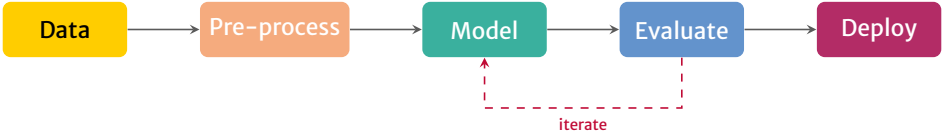

Figure 1: Example process diagram with a numbered figure caption.

TikZ diagrams integrate naturally with the UU colour palette. Use `UUyellow`, `UUgreen`, `UUblue`, etc. directly.

Code Listing

The `listings` package is pre-configured with UU colours. Specify the language and write code verbatim:

```python
def fibonacci(n):
    """Return the n-th Fibonacci number."""
    if n <= 1:
        return n
    a, b = 0, 1
    for _ in range(2, n + 1):
        a, b = b, a + b  # shift window
    return b

print(fibonacci(10))  # 55
```

Tables & Figures

Tables

Table 1: Theme files overview

File	Purpose
`beamerthemeUU.sty`	Main theme, options, fonts
`beamercolorthemeUU.sty`	Official UU brand colours
`beamerinnerthemeUU.sty`	Title page, blocks, special frames
`beameroutherthemeUU.sty`	Frame title, footline, logo

Figure in a Column Layout

Pair figures with text using `columns`:

- Left column carries the narrative
- Right column holds the figure
- Caption is numbered automatically

Use `[T]` on `columns` to top-align both sides, and `\centering` inside the figure.

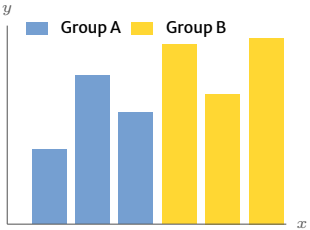

Figure 2: Sample bar chart with UU colours.

Sharing science,
shaping tomorrow.

Closing

Summary

1. Yellow-driven design, just as the UU likes it
2. Merriweather + Open Sans
3. Special frames: `\standoutframe`, `\thankframe`, `\sectionframe`
4. Options: `nl`, `showlogo`, `nosectionpage`
5. Multi-author slides: `\addinstitute{n}{Name}` + `\multiauthor`
6. Syntax-highlighted code via `lstlisting` with UU colours
